

If you are looking for an easy to launch, yet spacious rib, you might just have found one. When we first created the legendary RIB636 we mainly focused on sea keeping abilities and swift handling. With the new RIB646 we have kept those characteristics, but added a whole lot of space! With more than 1,5m internal beam there is space for the whole family and with the huge 170 litre fuel tank you can keep it going the whole weekend without worries.

The Hydrosport RIB646 is available in a Tender and a Patrol version.

As with all other Hydrosports, the RIB646s are made to order, according to your needs. Please visit us on Facebook for more pictures of the Hydrosport RIB646.

***RIB646 – You are a GO for launch!***

LOA: 6,46 m

Beam: 2,49 m
